Tooth Removal

Sometime a Dental Implant is not a good option to replace a tooth that requires extraction. When this is the case, a **Fixed Bridge** is an excellent alternative.

Our surgical team will work with your dentist to replace your tooth, giving a very natural appearance.

Before

After

Anchor Teeth

Teeth on each side of the gap used as abutments to support the bridge.

3D Analysis

In order to determine the full extent of the infection present, 3D analysis is often used.
