Oral Soft Tissue Lesions

The mouth is often referred to as the “Gateway” to the rest of the body. As a result, changes in your systemic health can often be first identified in the mouth.

Changes in hormones, immunosuppression, and blood sugar control are common conditions that cause oral lesions.

Before

After

Biopsy Submission

Often the lesion remove will be sent for a biopsy to get a definitive diagnosis.

Medications

Several different medications can cause different lesions to appear in the mouth. Blood pressure medications are common culprits.
