

WITHOUT GOOD PERIODONTAL HEALTH, YOU CAN'T HAVE GOOD GENERAL HEALTH.

Periodontal disease (gum disease) can affect your general health... and it can be affected by your general health.

Here are a few examples.

RESPIRATORY INFECTIONS¹

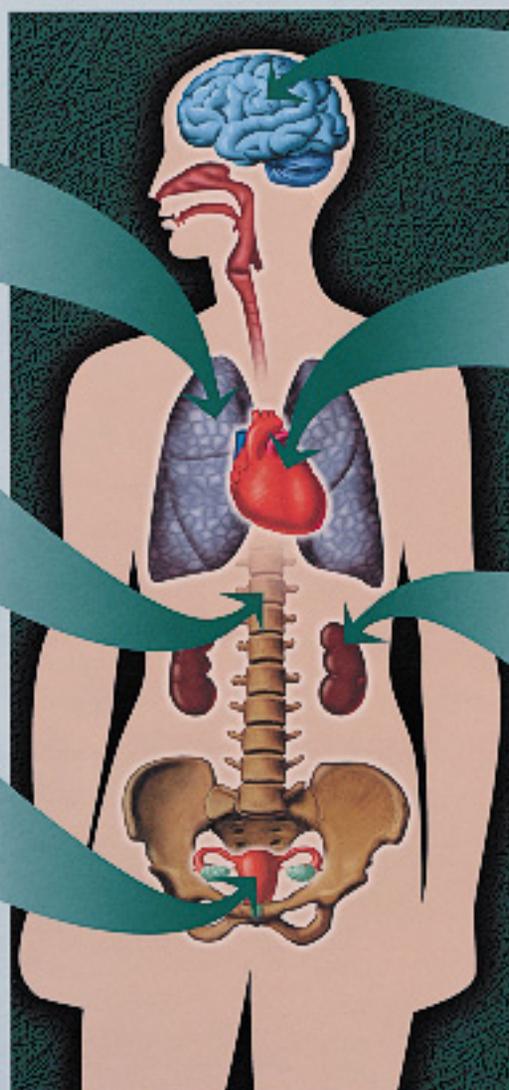

- Inhaling bacteria from the mouth and throat can lead to pneumonia
- Dental plaque buildup creates a dangerous source of bacteria that can be inhaled into the lungs

SEVERE OSTEOPENIA²

- Reduction in bone mass (osteopenia) is associated with gum disease and related tooth loss
- Severity has been connected to tooth loss in postmenopausal women

PRETERM OR LOW BIRTHWEIGHT BABIES³

- Women with advanced gum disease may be more likely to give birth to an underweight or preterm baby³
- Oral microbes can cross the placental barrier, exposing the fetus to infection.⁴

STROKE⁵

- Those with adult periodontitis may have increased risk of stroke

HEART DISEASE^{6,7}

- Those with adult periodontitis may have increased risk of fatal heart attack...^{6,7}
- And are more likely to be diagnosed with cardiovascular disease⁸
- Bacteria from the mouth may cause clotting problems in the cardiovascular system⁹

UNCONTROLLED DIABETES^{10,11}

- Chronic periodontal disease can disrupt diabetic control^{10,11}
- Diabetes can alter the pocket environment, contributing to bacterial overgrowth¹²
- Smokers with diabetes increase their risk of tooth loss by 20 times¹³
- People with type II diabetes are 3 times as likely to develop periodontal disease than are nondiabetics¹⁴

DO YOU HAVE ADULT PERIODONTITIS? WHAT ARE YOU DOING ABOUT IT?

Ask your dentist for a full periodontal evaluation and about the latest developments in periodontal treatment.
